ENERGY CONSERVATION POLICY

The college has implemented an "Energy Conservation Policy" as part of its commitment to environmental awareness and educational excellence. Energy usage is recognized as a crucial element of campus sustainability. It will be achieved through the development of a proactive and forward-thinking strategy aimed at implementing energy-efficient, responsible, and economically viable campus operations.

Objectives:

1. To adopt necessary strategies for the conservation of Energy
2. To inculcate the habit of saving energy among the students and the staff
3. To encourage the staff and the students become a part of energy conservation policy.
4. To replace all the tube lights by Light-emitting diode (LED) Lights to ensure a considerable saving in the consumption of energy
5. To adopt a mechanism to use renewable sources of energy by installing 40 kwh of solar panel
6. Using sensor based technology to save energy, the lift has sensor based technology, and lights in lifts have sensors. It will turn on and off if we open and close the doors or someone is inside the lift.
7. To switch off the fans and lights in Classrooms, Labs, Seminar halls, Media Room & Staff rooms when they are not used
